# FIESTA MEDICO

A classic in a  
new function

**BFIM2A** Standing washbasin mixer

The classic form of the Fiesta series  
- now with a new purpose.  
Additional models with a Medico handle  
will allow safe use of the mixer also in public  
bathrooms.

## Safety and sterility

### Standing washbasin mixer

G5/4 drain plug klik-clak  
chrome

**BFIM2**

With the new handle we can open the water jet without touching the tap with our hand.

The wrist-opening technique is intuitive and simple.

It gives additional protection against contact with surfaces where bacteria and viruses may remain.

## Specialist handle

There are many advantages of the so-called medical or elbow handle - from those related to hygiene safety to those related to its construction and functionality in use.

### Safe adjustment

The temperature and flow can be adjusted comfortably and safely with the elbow or wrist and the hands do not come into contact with the mixer surface.

### Ergonomics of the handle

Thanks to the length and design of the handle, the use of the mixer is also easier for people with limited hand efficiency.
